

SOFTWARE DEVELOPER

Experienced Full Stack Developer with expertise in ERP, POS systems, booking portals, and scalable web applications. Proficient in React.js, Angular, TypeScript and back-end development, with a focus on API integrations, cloud deployment and database optimization. Skilled in building responsive, high-performance applications that enhance business efficiency. Passionate about innovation and problem-solving in emerging technologies.

TECHNICAL SKILLS

- Programming Languages: Python, TypeScript, JavaScript
 - Frameworks & Libraries: Django, React.js, Angular, Bootstrap
 - Web Technologies: HTML, CSS, Bootstrap
 - Database : PostgreSQL, SQL
 - Cloud & Deployment: AWS
 - Version Control: Git, GitHub, GitLab
 - Documentation & Office Tools: MS Office (Word, Excel, PowerPoint), Google Docs
-

PROFESSIONAL EXPERIENCE

Software Developer

November 2023 - Present

Travidux Technologies Pvt Ltd

Developing ERP, POS, and booking systems, optimizing workflows, payments, and business operations. Designed scalable ERP solutions, integrated APIs and payment gateways, and enhanced security and performance for seamless user experience.

- **ERP Systems Implementation**

- Designed and developed ERP solutions for electronics, retail, and manufacturing industries.
- Built scalable ERP modules for procurement, inventory, sales, and finance automation.
- Conducted testing, debugging, and performance tuning to ensure smooth ERP deployment and operation.
- Provided technical support and created comprehensive documentation to streamline client onboarding and training for ERP and POS systems.
- Incorporated third-party APIs to enhance ERP functionality.
- Implemented and customized POS systems, enhancing transaction efficiency and inventory management for retail clients.

- **Booking System & Back-Office Portal Development**

- Developed a booking portal for clients to seamlessly book cruises and travel packages.
- Built a back-office system for managing bookings, accounts, staff, customers, and company operations.
- Configured secure payment gateways for seamless transaction processing.
- Optimized workflows for efficient booking, payment handling, and account management.
- Enhanced portal security with role-based access and data integrity measures.

Front-End Developer - Intern
NTH INDEX SOFTWARE SOLUTIONS LLP

January 2023- August 2023

- Developed highly responsive and visually appealing UIs using React.js.
- Focused on pixel-perfect, user-friendly designs with seamless responsiveness.
- Translated Figma designs into fully functional web interfaces.
- Enhanced user experience with dynamic and interactive components.
- Debugged and resolved UI issues to enhance application stability and performance.

Software Developer - Intern
RIGHT SOFT OPTIONS

January 2022- August 2022

- Developed reusable and efficient Python code to optimize backend performance.
- Acquired proficiency in Django and Flask frameworks for building scalable web applications.
- Integrated user-facing elements from front-end developers with robust server-side logic.
- Worked with HTML, CSS, Bootstrap, and JavaScript to support front-end integration.
- Applied OOP principles and utilized various Python modules for structured development.
- Used data science libraries like Pandas, NumPy, and Matplotlib for data processing and visualization.
